AMORIM CORK FLOORING

# AMORIM WISE

## WISDOM

Amorim WISE people apply experience, knowledge and ethics to make choices. They know that a clean environment is vital and that cork is the perfect solution for their homes. This is wisdom. This is being Amorim WISE.

## IMAGINATION

Can we imagine the future? Yes. Taking the facts into our own hands allows us to build the future as planned. Amorim WISE people are creative and expect more from brands. They want innovation, creativity and insightful products. Amorim WISE answers to these demands by providing cutting-edge solutions.

## SUSTAINABLE

Adopting a sustainable lifestyle is, more and more, a commitment made by people. Then it's natural to experiment and adopt sustainable practices. Amorim WISE is the brand that addresses this increasingly demanding public.

## ENTHUSIASM

Despite everyday concerns, enthusiasm is one of the characteristics of Amorim WISE people. This attribute inspires contemporary generations to believe in a better future and to act for change. Because of technology, sustainability or new lifestyles. Why Amorim WISE? Because when these people find a brand capable of expressing that idea, the path to partnership is open.

# When negative is extremely positive...

## **DO YOU KNOW WHAT “NEGATIVE CARBON BALANCE” MEANS?**

It is an extremely positive thing for the environment.

It's a breakthrough:

It means that more carbon is removed from the atmosphere than emitted during the production of some Amorim WISE products. For this reason, these products are CLIMATE POSITIVE.

## **IT RETAINS CO<sub>2</sub> FROM THE ATMOSPHERE**

For each ton of cork produced, the cork oak forest retains up to 73 tons of CO<sub>2</sub> from the atmosphere.

Cork also continues to retain CO<sub>2</sub> even after it has been transformed, maintaining its exceptional properties.

## **IT HELPS TO REDUCE GLOBAL WARMING**

# AMORIM WISE

## is Sustainable

With respect for nature and wellbeing as its core values, Amorim WISE has reached a remarkable negative carbon balance in most of its products, helping to reduce the global warming potential.

Amorim WISE floors are the purest outcome of a Circular Economy model that aims to turn waste and used cork stoppers into a valuable and sustainable product.

**9 YEARS**

The period of time between each cork oak harvesting.

**100.000**

Direct and indirect jobs are created by the cork industry.

**NO TREES ARE DAMAGED**

Or cut down during harvesting.

**CO<sub>2</sub> RETENTION**

For each ton of cork produced, 73 tons of CO<sub>2</sub> are retained from the atmosphere.

**CORK HARVESTING**

Is one of the highest paid agricultural jobs in the world.

**200 YEARS**

The average lifespan of a cork oak tree.

# Sustainable by heart

## Environment

Cork harvesting does not affect the retention capacity of the cork oak forest.

## Close distances

Factories are located within few kms from the forests.

## Economy

The cork oak forest creates jobs in the cork industry and in other related industries.

## Reincorporation of waste

Any cork waste and surplus is collected, granulated and reincorporated in the production process, originating a lower carbon footprint.

## Social Impact

The cork industry promotes settlement in areas at risk of desertification. Cork harvesting is an activity that crosses generations.

## Biomass

The dust from the production lines is vacuumed and conducted to silos, where it is burned to generate energy through biomass. More than 60% of our energy comes from cork dust.

# To preserve nature is to value life.

**Sustainability** is much more than protecting and preserving nature. It is, first and foremost, the concept of finding balance between us as human beings and our natural environment.

One of the core values of Amorim WISE is the **Respect for Nature**. With a green production process and use of natural, sustainable and recyclable raw materials, Amorim WISE promotes people's well-being.

Beyond its remarkable sustainability credentials, Amorim WISE is also a **high end product** that combines high quality with avant-garde and unique design. Inventiveness, inspiration, expertise and innovation are some of the words that describe Amorim WISE products.

Available in 3 different visuals such as cork, wood and stone, Amorim WISE is available in 3 technical solutions, Inspire 700, Pure and Pro, and one range of wall coverings, Dekwall.

Amorim WISE portfolio combines unique properties and the sustainability of cork, with innovative design and state of the art technology.

## Maintenance

# Optimal care for an everlasting beauty

To keep your floor spotless, Amorim has a set of auxiliary products available. Each of these has a specific purpose and is designed to make the caring of your floor as easy as possible. To be aligned with Amorim's commitment to wellbeing, we recommend the use of auxiliary products (levelling compounds, primers, adhesives or varnishes) that have low-emissions to the environment.

### Regular Maintenance

#### Soft Cleaner

This mild detergent is appropriate for weekly or even daily cleaning. It can be used to remove dirt, stopping it from infiltrating in the joints and in the regular embossing of the product.

#### Spray Cleaner

Designed for regular cleaning, this mild detergent has the advantage of being a spray, which makes it a quick and easy solution to apply directly on the floor. It is very effective in cleaning dirt or grease stains.

## Skirtings

In order to help create a more classy and harmonious interior, Amorim provides skirting profiles to complement your floor. Create your ideal transition between the walls and the floor, whether by an exact match or contrasting colours.

Contact your supplier for information on the available skirting references.

CE marking is a certification mark that indicates conformity with health, safety and environmental protection standards for products sold within the European Economic Area (EEA).

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/commercial buildings.

TÜV-PROFICERT is a transnational certificate for VOC-emissions and air quality, certifying that a product complies with different national regulations, such as AgBB, Belgian VOC regulation, Finnish M1 classification, BREEAM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

Blue Angel is a voluntary certification that follows rigorous environmental standards and is renowned as a reference guide for a more sustainable way of living. Blue Angel is synonym of a product (or service) that meets rigorous criteria of environmental performance such as being PVC free.

Greenguard certification identifies products that have low chemical emissions, improving the indoor air quality. The GOLD certification ensures that a product is acceptable for use in environments such as schools and healthcare facilities.
