# What are Kings Canyon products like?

**Kings Canyon brand comprises do it yourself products that will make transformation of your home extremely easy. They respond to needs of customers who appreciate modern style at a reasonable price.**

Kings Canyon products are an alternative to long and bothersome renovations. They make the whole process of transformation a joyful experience and help to achieve spectacular effects.

Kings Canyon is a friendly, colourful, smart and full of ideas brand that allows the whole family to work together. It doesn't create any financial, technical or aesthetic barriers

## Key features

- Dimensions of a panel: 1218 mm x 181 mm
- Thickness of a panel: 4 mm
- The 4-sided bevel emphasizes the structure of the wood
- Wear layer 0,3 (class 32)
- Warranty: 15-year warranty in housing conditions

## 100% waterproof and slip-resistant

The rigid floor is completely waterproof, which makes it suitable for use in such demanding rooms as kitchen, hall or bathroom. We recommend that in places extremely exposed to water, e.g. bathroom, the floor should be glued. This will prevent water and moisture from penetrating under the panels, which could lead to the formation of mold and unpleasant odors.

A **Kings Canyon** floor is R9 anti-slip, which means that we can safely walk on it even when our feet are wet after leaving the bath.

# Exceptional resistance

An important element of a vinyl rigid core flooring is the outer layer.

It is a UV-curable ceramic matt coating which is 0.3 mm thick. Thanks to it, the **Kings Canyon** floor is very resistant to all stains and scratches, even if we put it in the hall, where we enter with muddy shoes and often bring sand.

This solution places our floor in the so-called 32nd class - which means that the floor can be used in rooms with medium traffic. The manufacturer gives a 15-year warranty on **Kings Canyon** vinyl rigid core flooring used in residential premises.

## The new quality of the floor

Vinyl rigid core flooring is a new quality in the **Kings Canyon** brand flooring offer. A rigid core gives it exceptional durability and the UV-curable ceramic matt coating makes the floor resistant to scratches and stains. The construction of the panels ensures their complete water resistance.

The advantage of rigid flooring is that it can be used on uneven floors without a self-leveling screed, which is a must for laminate or vinyl floors without a rigid core (note: for unevenness  $<2\text{mm}$ ). Importantly, the rigid floor can be laid directly on ceramic tiles without filling the joints, which will remain invisible under the panels.

Installing a rigid core floor is much easier than with other vinyl floors: an assembly knife is enough to cut the panels, and joining the panels is quick and easy thanks to the locks of the rigid floor.

The product is suitable for rooms with water underfloor heating, and its technical parameters make it an ideal floor for use in apartments..

## Vinyl rigid core flooring | Structure

UV-curable ceramic matt coating

Wear resistance layer

High quality decorative film

Rigid core technology

## Vinyl rigid core flooring | Colours

The colors of the vinyl rigid core flooring are 8 shades of oak. It is worth paying attention to the deep structure recreating the wood pattern obtained thanks to the high-quality decorative film, which is one of layers of a panel. The developed effect gives the **Kings Canyon** vinyl rigid core flooring the appearance of a natural oak floor.
